Site-Level Recycle Bin for Fast Recovery of Deleted Sites and Site Collections

During the course of business, sites and site collections can be accidentally deleted. Without a fast and efficient way to restore these elements to their latest working state, productivity and user confidence can suffer. Swift and convenient recovery of these critical elements is now possible with DocAve SiteBin. This powerful module allows administrators to instantly restore entire sites and site collections in the exact state they were prior to deletion – thereby reducing Recovery Point Objectives (RPO) to zero, and Recovery Time Objectives (RTO) to mere seconds. Never has the recovery of deleted SharePoint sites and collections been so reliable and effortless.

Business Advantages

- **Minimise productivity disruption following accidental deletions**

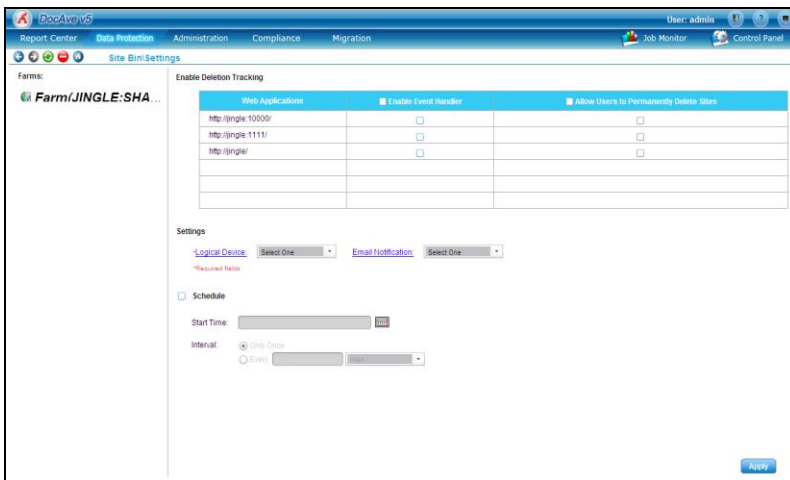

Avoid traditional recovery protocols to accelerate restoration of sites and site collections unintentionally deleted

- **Safely Delegate Site recovery tasks to Site Administrators**

Entrust site administrators with the ability to restore sites without accessing stored backups

- **Zero data loss following deletion events**

Restore site collections and sites in the exact state they were at deletion, thereby eliminating data-loss due to time-windows between backups

Fully integrated into the DocAve Software Platform interface, SiteBin is a cost-effective and reliable solution for the fast recovery of deleted sites and site collections. With fully customisable size thresholds and forced-deletion parameters, administrators maintain total control over deletion-event management. With DocAve SiteBin, full fidelity, on-demand restoration of critical SharePoint sites and site collections has never been easier.

 **AvePoint®**
Unleashing the Power of SharePoint™

DocAve SiteBin Technical Advantages

DocAve SiteBin allows organisations to swiftly restore sites and site collections directly to their production environments with ease, by delivering the following technical capabilities:

- Globally deploy SiteBin across multiple farms via the unified DocAve interface
- Minimised data loss with real-time backup of sites and site collections at the time of deletion
- Easy restore via unified SharePoint tree-view, allows you to trigger a restore with one simple click
- Optional deletion choices for SharePoint power users (customisable by the administrator), including a “forced deletion” of unwanted content to minimise impact on system resources
- Customisable thresholds for forcing deletion of extremely large content to mitigate performance-loss

How To Buy DocAve

Telefon: +49 (0) 89 20 80 39 – 660
