Respond to Legal Requests with Speed and Precision

Organisations must be prepared to respond to any type of legal inquiry with clarity and efficiency. Content residing in SharePoint that is responsive to legal requests must be made available in a timely and comprehensive manner, without burdening staff and resources. DocAve eDiscovery delivers the tool organisations need to meet all eDiscovery obligations – from responsive content identification and reporting, to legal holds and access-sensitive archiving.

During eDiscovery proceedings, responses to material requests must be timely and complete. DocAve eDiscovery provides the tools organisations need to manage eDiscovery events with confidence. Leveraging SharePoint Search Index data, DocAve can scan all active and archived content to identify responsive materials by both full context search and metadata field(s). Once identified, these materials – along with all associated metadata and audit histories – can be easily exported to multiple file formats for external, third-party review. Be prepared for any electronic discovery proceeding with the industry's most powerful tool for SharePoint eDiscovery.

Business Advantages

▪ The Data you Need, Delivered Fast and Complete

Limit and expand the scope of your response according to legal demands with flexible and complete metadata and full-text based searches, and search both active and archived content with ease.

▪ Satisfy 3rd party Requests Without Burdening Staff and Resources

Deliver responsive data to any requesting party via exportable, multiple-file formats containing every required data point, including critical metadata. Granularly grant compliance officers access to DocAve eDiscovery via its browser-based interface.

▪ Become Proactive with Regard to Legal Compliance

Efficiently implement and manage 'Legal Holds' for specific SharePoint content on demand. Proactively meet legal requirements and compliance obligations with appropriate dexterity and scope.

AvePoint[®]
Unleashing the Power of SharePoint[™]

Technical Features of DocAve eDiscovery

DocAve eDiscovery allows organisations to respond to discovery and other legal requests quickly and completely, by delivering the following technical capabilities:

- Full context search of all active and archived SharePoint content by keyword, key phrase, pattern, or random sampling
- Search and distil any SharePoint content by metadata tags (such as *Created By* and *Modified By*)
- Easily export search results in .CSV, .XLS, or .PDF format for external review and 3rd party delivery
- Export eDiscovery search results - including individual list items - with only responsive metadata and audit histories
- Implement Legal Holds on SharePoint items to limit access/modification rights and/or create immutable, full-fidelity copies of held content
- Perform advanced and complex searches without affecting performance of your SharePoint environment via load-balanced searching and utilisation of SharePoint Index Data

How To Buy DocAve
